(10k-grade)

Hubei Kipoer Plastic Packaging Co., Ltd. Founded in August 2015 with a total investment of 30 million USD, Hubei Kipoer Plastic Packaging Co., Ltd. is a professional manufacturer specializing in the deep processing and molding of PET and PP materials. Committed to the spirit of craftsmanship, the company focuses on providing safe, hygienic, eco-friendly and innovative food-grade packaging containers. Its current product range covers food packaging containers for fruits and vegetables, baked goods, fresh produce, dried fruits, tea drinks and more. After years of development, the company has gradually gained high credibility and influence in the industry, and independently owns the "Fresh Fruit Delight" brand trademark. It has become a qualified and efficient professional manufacturer of PET material packaging, and an excellent strategic partner dedicated to providing customers with complete packaging solutions!

50,000

Total Workshop Area (m²)

30,000

Annual capacity 30tons

The company now has advanced domestic PET and PP sheet production lines, an outstanding R&D team and elite production technical talents, with an annual production capacity of 30,000 tons. It also has a very advanced fully automatic thermoforming integrated machine production line from Hong Kong Electric Industry, with a monthly production capacity of over 200,000 cases of various packaging containers! Under the guidance of strict quality control and a scientific management system, the "Fresh Fruit Delight" brand PET packaging containers has become a high-quality brand in the industry, deeply trusted by a wide range of customers!

Corporate Culture

Vision:

Building a leading industry position through brand strength, and creating a beautiful home for strivers!

Mission:

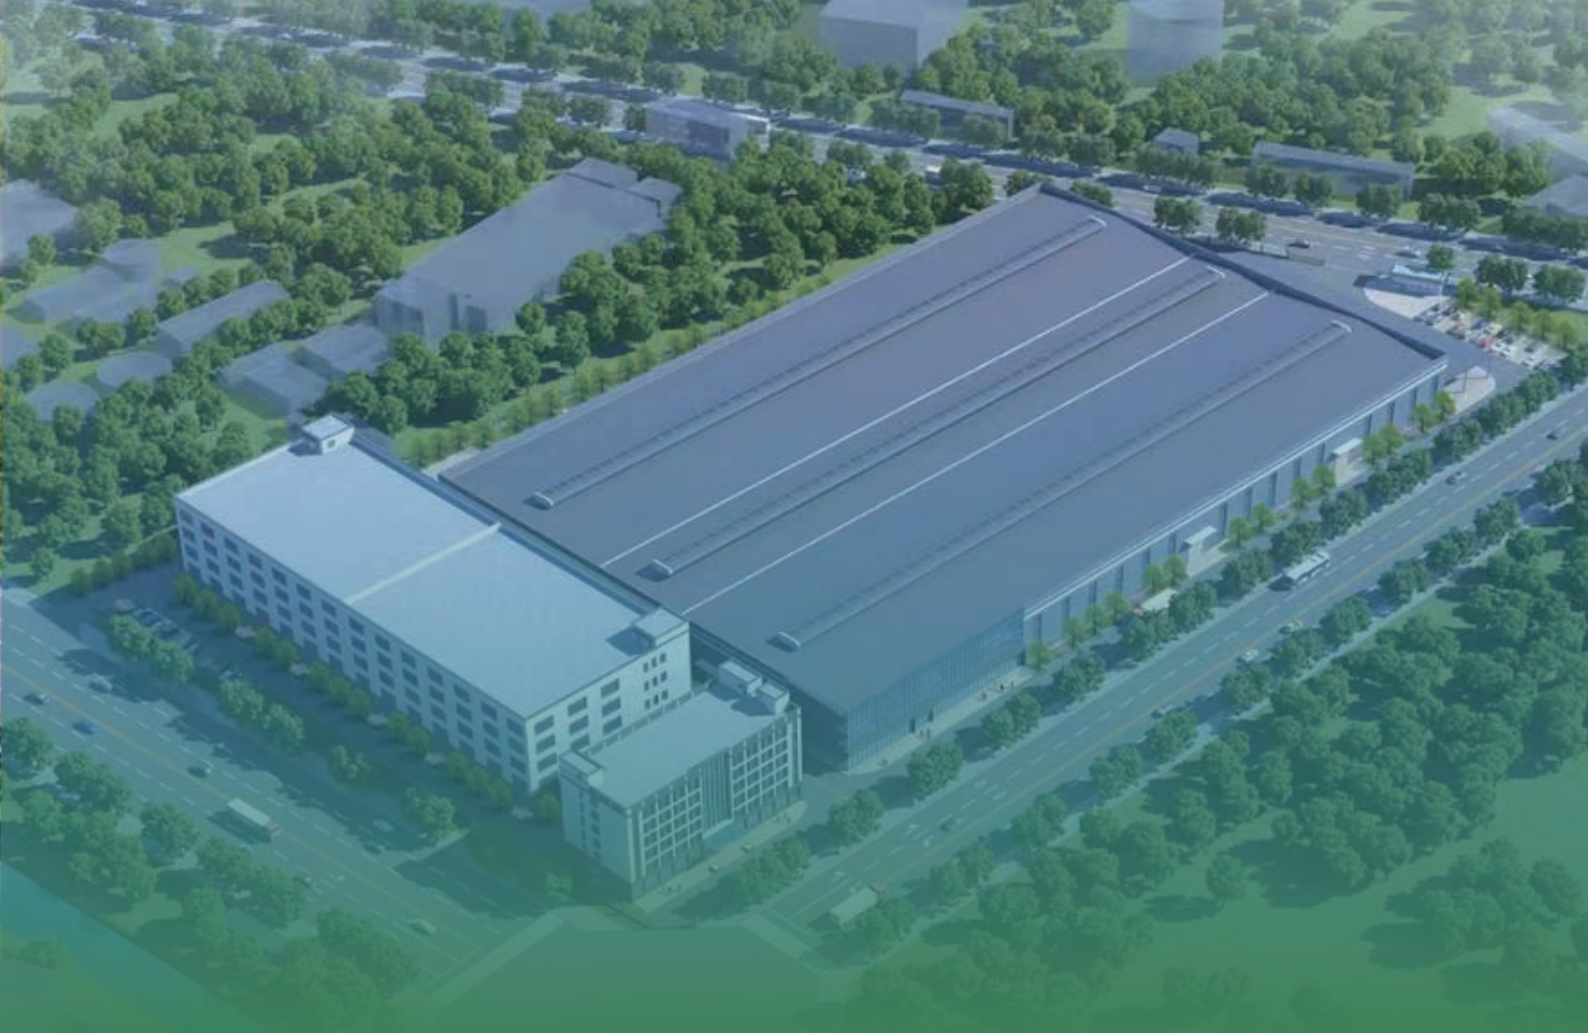

To be the leading environmental packaging manufacturer by exceeding customer expectations through uncompromising quality, cost leadership, and exceptional service.

Values:

Keep Innovative, Precise, Odorless, Efficient and Reliable

Development History

August 2015

Equipment installation commenced as the extrusion line was brought into the factory. In September of the same year, the company swiftly entered the sampling and trial production stage.

May 2018

The company turnover surpassed 8 million USD, marking a period of strong growth. The company also invested in fully automated forming machine equipment, officially entering the consumable market.

December 2021

Sales turnover exceeded 22 million USD, while the company took a major step in brand building with the registration of its own trademark “**FRESH FRUIT DELIGHT**”. In the same year, cup lid production equipment was introduced, expanding the product portfolio.

March 2025

Relocated to the new office and production base, marking a comprehensive upgrade. Established a 100,000-class clean-room, built a self-operated warehouse-style logistics system, and added a PP production line and a PET cup production line—enhancing both production capacity and quality.

April 2023

Annual sales reached 30million USD, ushering in a new phase of development. The company acquired 70 acres of land and initiated planning for a modernized factory, laying a solid foundation for long-term growth.

Modernized Facility

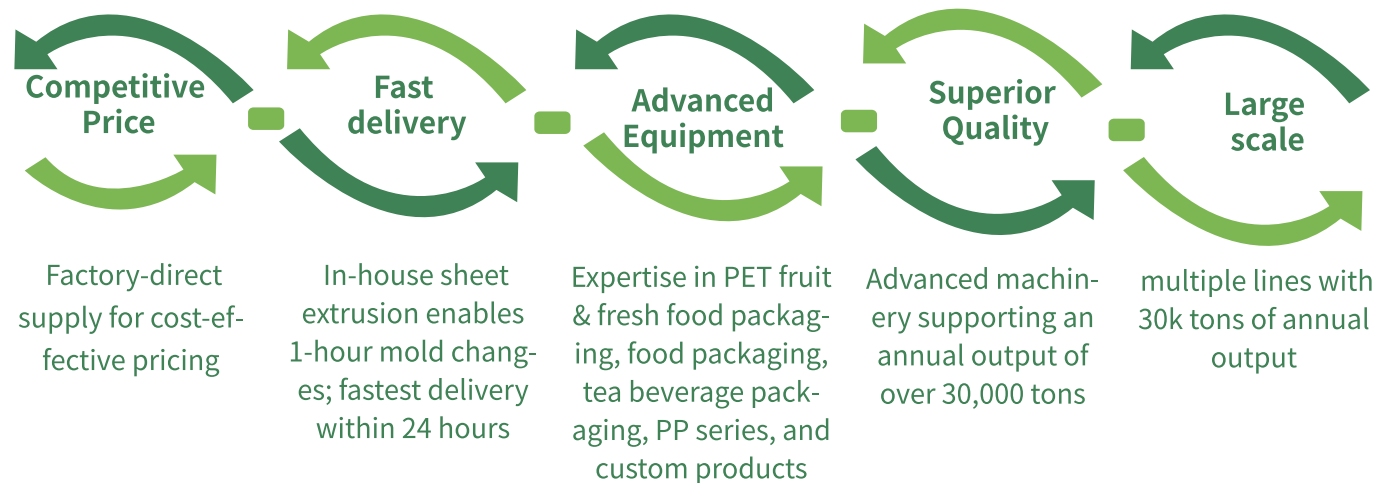

To ensure product quality and full-chain service advantages, Our company has established a high-standard production support system, equipped with 100,000-class GMP clean production workshops, material R&D laboratories jointly built with universities, and precision mold processing centers, thus forming an integrated industrial support framework that encompasses R&D, production, and manufacturing.

The factory has a total area of 50,000 m², including 5,000 m² of Class 10,000 medical-grade cleanroom, 10,000 m² of Class 100,000 food-grade cleanroom and 35,000 m² of standardized storage areas. It fully supports high-quality, large-scale, and stable production, providing a solid guarantee for both quality and delivery capability.

Our Advantages

Smart Operations

Through digital management, real-time monitoring, and data analytics, Hubei Kipoer Plastic Packaging Co., Ltd. responds swiftly to market changes, optimizes production planning, and ensures efficient resource utilization.

Innovation-Driven R&D

The company has established a robust R&D model—"Integrating acquired technologies with independent innovation"—with a sustained focus on PET packaging for fresh fruits and vegetables. By continuously identifying and integrating new technologies and concepts, we consistently launch competitive new products.

Integrated Supply Chain

Our supply chain management enables favorable raw material pricing through centralized procurement, optimized inventory management to reduce storage costs, and streamlined logistics to lower transportation expenses. This ensures accurate, on-time delivery of products and services, enhancing customer satisfaction and loyalty.

Company Qualifications

The company has successively obtained multiple management system certifications, including ISO9001, ISO14001, and GRS, and BRC and has established a strategic partnership with Cangcai Consulting Group for lean production management support. It has received numerous honors, such as being recognized as a Specialized and New Enterprise in Hubei and a AAA Credit-rated Enterprise. In collaboration with a research institute in Hunan, the company has established a New Materials Research and Development Center to jointly develop new materials in this specialized field. Additionally, it has set up a Mold Design and Processing Center to achieve rapid coordination between production and research and development.
